

APPROACH CONSTRUCTION

Effective: January 1, 2008

The Municipality will construct one residential or agriculture approach per parcel granting access from a municipal road to the parcel. Any additional approaches are subject to approval of Council and at the cost of the property owner or developer.

Developers wishing to construct an approach, must submit a request in writing, including a location plan. Developers will be invoiced an administration fee of \$50.00 for each approval request.

If approved, all approaches must be constructed to the following standard:

1. Top width 8 – 10 meters
2. 10 meter radius flares onto the roadway
3. 5:1 side slopes
4. 500 mm culvert to be installed, if culvert is required.

RATIONALE:

To control municipal costs associated with construction and maintaining access approaches.

To control the number and location of access approaches to ensure traffic safety.
