

APPROACH WIDENING CONSTRUCTION

Effective: September 22, 2008

The Municipality will widen one existing residential or agriculture approach per parcel granting access from a municipal road to the parcel. Any additional approaches are subject to approval of Council and at the cost of the property owner or developer. All approaches widened must comply with the existing Approach Construction Policy.

If the Municipality constructs the approach widening, the Municipality will be responsible for the following:

- Supply and cost of culvert (one extension only);
- Construction of the approach widening and ½ the cost of construction;
- Complying to the RM's Approach Construction Policy; and

the property owner will be responsible for the following:

- Formal written application for approach widening;
- \$50.00 Approach Construction Administration Fee;
- Cost of a second culvert extension if required;
- ½ the cost of construction for widening.

If the Property Owner constructs the approach widening, the Municipality will be responsible for the supply of culvert and cost of one culvert extension only, leaving the Property Owner responsible for the remainder of the costs as well as constructing the approach in compliance with the specifications of the existing RM of Paynton #470 Approach Construction Policy.

RATIONALE:

To control municipal costs associated with widening existing access approaches for farm machinery access.
